Errata

Below are possible mistakes I have identified in the book How to Prove It (2nd edition), by Daniel J. Velleman.

```
p 193 - line 12 - the word "get" should be "set"
```

p 253 - exercise 13 (d) - I think $\forall b \in B(g(b) \in h(b))$ should be $\forall b \in B(g(b) \in h^{-1}(b))$ because h is a function from from A/R to B and therefore b is not in the domain of h but b is in the domain of h^{-1} . I also was not able to complete the exercise unless the h was changed to h^{-1} .
